

There are two Post-Doc opportunities in France listed below. If you are interested in one or both of these, please see the contact information included with each listing.

POST-DOC IN BRAIN IMAGING, STRASBOURG (FRANCE)

A post-doc is available at the LSIIT (Image Sciences, Computer Sciences and Remote Sensing Laboratory) to study the reconstruction of high-resolution in utero fetal brain images. This project is funded by an ERC Starting Grant. Please send a CV, a brief research statement and names of two referees to rousseau@lsiit.u-strasbg.fr. Learn more <http://lsiit-miv.u-strasbg.fr/miv/sthese_fiche.php?id=7&page=these> .

POST-DOC IN YEAST NUCLEAR ORGANIZATION, INSTITUT CURIE, PARIS (FRANCE)

Applications are invited for a postdoctoral position at the Institut Curie in the group of Dr. Angela Taddei studying the compartmentation and dynamics of nuclear functions. Current work of the lab focuses on determining the spatial and temporal behavior of chromatin and how this affects two essential functions of the genome: gene expression and the maintenance of genome integrity. This project is funded by an ERC Starting Grant. Contact: angela.taddei@curie.fr
