

Position: Program Analyst (contractor support for DoD)

Qualifications: Ph.D. in a life science (preferably physiology, neuroscience, or a related field), plus a minimum of 2 years postdoctoral experience. Experience in program management is desirable.

Duties include subject matter expertise and consultation, program support/analysis, acquisition and S&T roadmapping, concept generation, financial execution, proposal generation and review, conference/workshop organization, preparation of draft analyses and reports relevant to program goals and results, and similar tasks.

Programs being supported provide medical technologies that provide combat casualty care in the military environment. Areas of research include Neurotrauma, Advanced Forward Care, Pain Management, Tissue Regeneration, Wound Healing and Repair, Pharmacologic Resuscitation, and other similar areas. The range of research includes basic, applied, and advanced technological development.

Location: Northern Virginia

Please send a resume with cover letter, references, and salary requirements to Dr. Judy Lytle, Director of the AVIAN Engineering S&T Division, at judy.lytle@avianeng.com.
