

--FACULTY SEARCH ANNOUNCEMENT
Assistant / Associate / Full Professor – Division of Epidemiology

The Ohio State University College of Public Health is searching for candidates for a tenure-track or tenured faculty position in cardiovascular epidemiology. Candidates must be able to collaborate with existing faculty and to develop their own program of funded research. High quality graduate teaching and advising are also expected. A doctoral degree in public health, medicine, or a related discipline is required. Rank and salary will be determined by the candidate's credentials. For appointment to a tenured position, applicants must have a strong record of funded research and peer-reviewed publications. Applications will be considered as they arrive and the date of appointment is open to negotiation. The Ohio State University College of Public Health was formed in 1995 and is fully accredited by the Council on Education for Public Health. The College is an integral part of the country's most comprehensive health sciences center -- the Colleges of Medicine, Pharmacy, Nursing and Dentistry, as well as the James Comprehensive Cancer Center and the Ross Heart Hospital, are adjacent to the College of Public Health. Located in the state capital and a metropolitan area of more than 1.5 million, Ohio State offers excellent opportunities for interaction with practitioners, policymakers, and academic colleagues. More so than in many institutions, successful candidates will be able to help shape the direction of the Ohio State College of Public Health as it expands over the next five years. Senior candidates will also have the opportunity to bring or recruit junior colleagues. Please send CV and letter of application to: David M. Murray, Ph.D. Chair, Division of Epidemiology
College of Public Health, The Ohio State University B222 Starling-Loving Hall, 320 West 10th Avenue Columbus, Ohio 43210
