

**FDA/Center for Biologics Evaluation and Research
Office of Vaccines Research and Review
Division of Bacterial, Parasitic, and Allergenic Products
Laboratory of Mycobacterial Diseases and Cellular Immunology**

A post-doctoral (or technician) research ORISE position is available for a highly motivated candidate with a strong background in immunology. Research area: immune responses to intracellular pathogens, particularly T cell-mediated pulmonary immune responses to *Mycobacterium tuberculosis* and *Francisella tularensis*.

Qualifications:

Experience in basic molecular biology, flow cytometry, and working with animals is preferable, but not required. A creative approach, initiative, the ability to analyze data, and good oral and written skills are expected from the candidate. Individuals with a M.S. degree or with a Ph.D. (no more than 3 years post graduation) are welcome to apply.

Location:

The laboratory is located on the NIH campus in Bethesda, Maryland and offers an excellent environment for professional development.

Salary Range:

Candidates will be offered competitive salary based on their experience.

How to Apply:

Please e-mail your curriculum vitae, names and contact information of references, along with a cover letter by November 13, 2009, to Dr. Siobhan Cowley:
